

EXTENSIS® MASK PRO™

Professional precision masking tools for Adobe® Photoshop.®

Create professional-quality precise image masks in Adobe Photoshop with Extensis® Mask Pro™. Its innovative color matching technology and elegant vector-based clipping paths give you the power to create professional-quality masks in minutes. Extensis Mask Pro extends your control far beyond edge-detection methods.

With Extensis Mask Pro, even the most difficult images become easier to mask — leaves, grass, even hair! Use eyedroppers to select which colors to keep (the hair) and which colors to drop (the background). Then smoothly mask away the drop colors. With total control over the color and brush softness, plus multiple undos and redos, you have the freedom to mask perfectly every time.

Mask Pro cuts masking projects down to size, leaving you more time to be creative.

To order, obtain site license pricing or learn more, contact your reseller today or call us at (800) 796-9798 or (503) 274-2020.

- **Quickly and easily create image cutouts and selections for optimal web designs, composites, isolations, color corrections and more.**

EXTENSIS

PRECISION TOOLS

Easily mix and match tools and adjust settings for the accuracy you need.

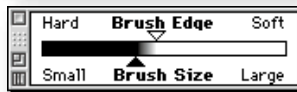

NAVIGATOR WINDOW

Navigate complex images easily with zoom and pan controls.

KEEP AND DROP

Innovative color matching technology simplifies selecting which colors you keep and which colors you mask away.

COMPLETE USER CONTROL

Easily select the softness and threshold for precise control over the mask's edge. Adjust the size and softness of the masking brush.

POWERFUL MASK GENERATION — Create professional-quality masks for image composition, isolations, color corrections, complex selections and more.

SUPERIOR MASKS — Innovative color matching technology surpasses current edge-detection methods. By matching colors instead of detecting edges, you can mask complex images more accurately.

EASY-TO-RIP CLIPPING PATHS — Vector-based, non-Bezier clipping paths apply instantly and eliminate "jaggies." Control the tolerance and choke of the path.

COMPREHENSIVE TOOL COLLECTION — Mix and match tools for ultimate precision.

Magic Brush — Smoothly mask away colors selected in the drop palette.

Standard Brush — Paint indistinct boundaries or remove unwanted details.

Airbrush — Paints soft-edged strokes on an image.

Magic Fill — Easily patches holes or removes stray pixels left in the mask.

Bucket Fill — Instantly fills closed areas in the mask.

Magic Wand — Allows for intelligent selections based on the color matching technology.

Pen Tool — Draw straight or curved line segments.

INTUITIVE COLOR SELECTION — Use familiar eyedroppers to include or exclude colors from your mask. Drag across areas to quickly indicate average colors. Multiple colors and color sets can be organized to simplify masking complex images.

TOTAL EDGE CONTROL — Adjust the softness of the mask's edge, change the brush size, or fine-tune the threshold of the keep colors with easily accessible keyboard shortcuts.

MULTIPLE UNDO / REDO — Reliable, multiple, progressive undo and redo creates time-saving shortcuts and help protect your work against unwanted changes.
