EXTENSIS PREFLIGHT PRO

Prevent prepress waste by preflighting files and automating workflow.

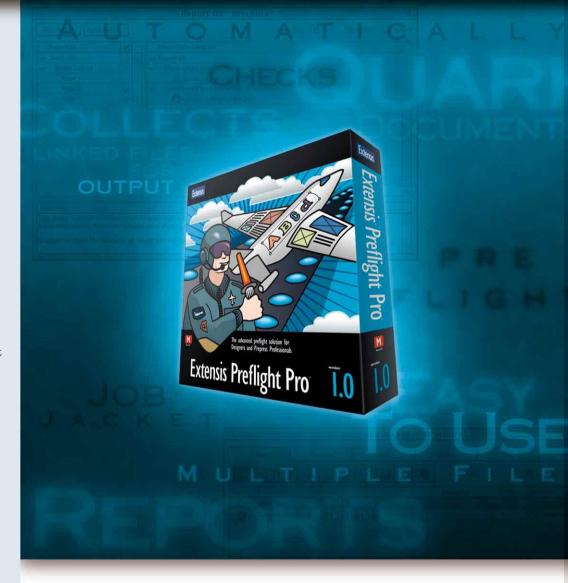

Extensis® Preflight Pro™ is preflight done right. It will prevent wasted film and prepress labor, the key to profitability for both designers and prepress specialists.

Use the Job Jacket to track job details throughout the process. Inspect multiple files based on output preferences customizable for each job. From the concise yet instructive report, use the Pilot like a spell-checker to immediately correct any problems right in QuarkXPress™. Once the files are clean, easily collect all the job files for perfect prepress delivery.

For ultimate speed, integrate Extensis Preflight Pro into your workflow with its support of Luminous OPEN automation.

Extensis Preflight Pro will dramatically streamline your preflight workflow, saving you time, materials, headaches and money.

To order, obtain site license pricing, or learn more, contact your reseller today or call us at (800) 796-9798 or (503) 274-2020. Visit http://www.extensis.com for the latest Extensis Preflight Pro information.

- Prevent prepress waste and increase profitability by streamlining the preflight process.
- Collect every element of your job documents, images and fonts for perfect prepress delivery.
- Inspect multiple files based upon individual, customizable profiles.
- From the detailed, instructive report, use the Pilot feature to correct errors immediately in QuarkXPress.
- Supports Luminous® OPEN™ workflow automation and scripting.

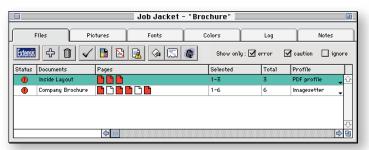

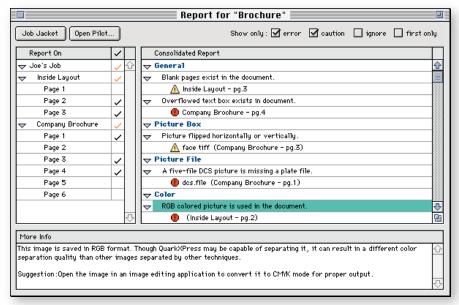

EXTENSIS PREFLIGHT PRO

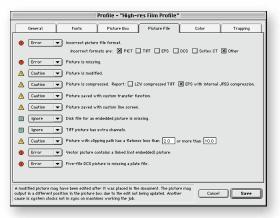

JOB JACKET

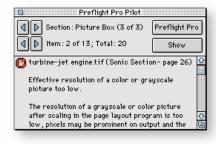

A familiar interface provides users of all skill levels fast access to everything needed to successfully manage the workflow.

REPORT WINDOW

Concise, instructive reporting in one click.

PILOT

Works like a spell-checker to help you correct problems immediately in QuarkXPress.

CUSTOM PROFILES

Set three different levels of reporting for over fifty potential problems.

JOB JACKET — Provides immediate access to the powerful preflighting functions of Preflight Pro. The familiar interface of the industry-standard job jacket lets users of any skill level track every detail of projects as they progress through the workflow.

MULTIPLE FILES — Inspect and report on multiple files. Process the entire job at once rather than one file at a time.

THOROUGH DOCUMENT INSPECTION — Locate and extract key information on every element, images, fonts, colors and more.

REPORTING — Concise, instructive and easy to read, the report is completely flexible. View the entire job or any combination of files, pages and elements. Select from three levels of reporting errors.

PILOT — Like a spell-checker, the Pilot takes you directly in QuarkXPress to find problems, suggests intelligent solutions and lets you immediately fix the problem.

COLLECTION — Collect every element of the job, including embedded fonts, to be completely prepared for final output. Compress job files into one or several archives for quick and easy transfer.

CUSTOMIZABLE INSPECTION PROFILES —

Create custom inspection profiles based on individual document needs. Set three different levels of reporting — error, caution, or ignore — for over fifty potential problems. Share profiles with your clients to ensure their documents output correctly.

GET INFO — Get more detailed information on virtually every element included in job files — pictures, colors, fonts and more.

LUMINOUS OPEN AWARE — Integrate Preflight Pro into your automated workflow using Luminous OPEN workflow scripting.

COMPATIBLE WITH QUARKXPRESS 4.0
