PREDATOR SOFTWARE AT IMTS® 2000 (BOOTH #D-3225)

Company to demonstrate new shop floor control and data collection products

PORTLAND, ORE – August 28, 2000 – Predator Software Inc. today announced that it is launching two new product offerings at this year's IMTS 2000 show, held September 6-13, 2000, at McCormick Place Lakeside Center in Chicago, Ill.

Located in Hall D (Controls & CAD/CAM Pavilion), Booth #D-3225, the company, along with local resellers, will be introducing Predator MDC™ (manufacturing data collection) and Predator Desktop™. Predator MDC is a network-based application that collects, reports, graphs, and processes shop floor manufacturing data in real-time. Predator Desktop™ is a secure desktop interface that enables users to view and/or access production documents from any PC on their network, corporate intranet, or the Internet, while automating DNC, data collection, and other shop floor manufacturing processes. Predator will also demonstrate recently announced products, including Predator DNC™, a direct numeric control product, and Predator Virtual CNC™, a CNC verification and simulation application.

Reseller support for this year's show will be provided by BA Solutions of Cincinnati, OH, COM1 Information Technologies of Haddon Heights, NJ, Executive Management Technologies of Cleveland, OH, Machinery Systems Inc. of Schaumburg, IL, Programming Plus of New Berlin, WI, Services Four Automation of Maynard, MA, Shop Floor Automations of San Diego, CA, Shop Operation Systems of Cincinnati, OH, Triad of Wheat Ridge, CO, and UniqueLink of Leesport, PA.

IMTS 2000 show hours are 9am-5pm, Wednesday, September 6 through Wednesday, September 13, except Sunday, September 10, from 10am-4pm.

As the largest manufacturing trade show in North America, IMTS 2000 attendance is expected to top 125,000 attendees, while 1,500 exhibitors display and demonstrate the latest manufacturing technologies. For general information, contact AMT Show Management at 800-828-7489.

About Predator Software Inc.

Predator Software Inc. is a privately held developer of CNC verification software, turnkey DNC and shop floor networking solutions, and a suite of manufacturing execution system (MES) software tools, including manufacturing data collection, electronic work instructions, and tool/gauge management. Based in Portland, Oregon USA, with offices in Chicago, Illinois USA; Kansas City, Kansas USA; Cambridgeshire, UK; and Barcelona, Spain, Predator Software products are available through a global network of value-added resellers.
